

Hello, I'm Sojin Oh

Software Engineer transitioning to Human-Centered Designer

Experience

● Amazon (Jul 2020 - May 2026)

Seattle, WA

Software Development Engineer I → II

Silk (Amazon's built-in browser) on Fire TV Team

- Collaborated with UX and product partners to redesign browsing interactions on Fire TV, shipping browsing history and autocomplete to 100% of Silk on Fire TV customers with no drop in engagement and a measurable lift in search revenue.
- Delivered ongoing feature improvements through continuous release cycles and A/B experimentation, validating UI and interaction changes through data-driven testing.
- Delivered Safe Browsing support for Silk on Vega OS, protecting users from harmful sites while removing the Chrome dependency and preserving performance and UI continuity.
- Partnered with the Amazon WebView team to onboard WebView to next-generation Fire OS platforms for tablet and TV, aligning with modern Android (AOSP) standards.

Silk Infrastructure Team

- Led migration of all core Silk infrastructure services to a modern AWS-native architecture, improving security, performance, and reliability of internal tools.
- Enhanced CI/CD infrastructure supporting Silk software delivery, increasing developer efficiency and maintaining a consistent customer experience across Fire devices and releases.

● Concord USA (Jul 2019 - Jun 2020)

Hopkins, MN

Data Integration Consultant

- Designed REST APIs and MuleSoft data integration workflows for SAP and Salesforce systems, using custom Java solutions to streamline data exchange and improve automation.
- Partnered with stakeholders to translate business needs into actionable technical requirements.

Education

● University of Washington (Starting Sep 2026)

Seattle, WA

M.S in Human-Centered Design & Engineering

● Macalester College (Sep 2015 - May 2019)

Saint Paul, MN

B.A in Computer Science and Statistics

- GPA: 3.90/4.00 (Summa Cum Laude)
